1、 How do we log in to the ORIGIN mainnet in the deep web and learn about this matter?

We like to look for unknown areas in the 96% invisible Internet network. When browsing information on the deep web recently, we discovered a unique official website. The content of this official website covers magnificent religious beliefs, long history and culture, many little-known real-life decrypted events, and how decentralized technology is subverting the real financial world.

We spent a week repeatedly verifying and reviewing its contents. It is necessary to let more people know the specific information of ORIGIN and let more people participate in the research of this decryption project. We also attach the ORIGIN deep network Login Method:

Download and install TOR Browser:
https://apps.apple.com/us/app/onion-browser/id519296448

Open the TOR Browser and visit the "ORIGIN" deep web
URL:http://w3qvi6zoryvahcvmojolyj64ra33ealb4adf2a5t3o4bcivyrwfeorad.onion

2、 What kind of organization or institution is ORIGIN, and what is its connection with Project Camelot? Why is this project mentioned so many times on the dark web?

Through research on the contents of the ORIGIN deep web, this is a group of anonymous organizations composed of teams from multiple countries. Its members are extremely rigorous in reasoning about the entire history of Western culture and events. The chapter structure in its "Fearless Contract" is consistent with Dante's "Divine Comedy" is similar, as quoted in a chapter of his "Manifesto":

Real angels may not be angels, and real demons may not be because some demons will wear angel masks. Satan always disguises himself as an angel of light. We can only hide behind demons and be darker than darkness. Darker because we are fighting against the oldest Gelt in the world, and we will walk the world doing good, as the Rosicrucians say.

At the same time, the contents stated in this contract are all true words spoken by ORIGIN's veteran observers and those who have experienced them. There are no fictitious words. Only the most authentic information is recorded to our apostles so we

can understand this hellish world and enlighten.

We pay tribute to the brave, free-thinking people who suffered for their fraternity and protect and support those who follow their path. We will always admire the many extraordinary people who paid the highest price in their lives to tell the truth. We are also committed to exposing the truth, providing shelter, and trying our best to help all humankind.

ORIGIN will shake up this hellish world. We are waiting silently at the bottom of hell. We have no intention of ending our lives. We do not allow our truth, ideas, freedom, or work to be oppressed. We support freedom of thought, wealth, human rights, and freedom of speech, no matter how radical these ideas may seem. We dare to stand up for freedom and steadfastly united against all odds. If anyone has ever claimed that we have committed suicide, disappeared, been imprisoned, betrayed others for financial gain, or even engaged in internal strife for factional interests, we would like to declare that these claims are all false information fabricated by others.

Our working environment is harsh; we have not seen the light of day for several years, there are dangers everywhere, and we may not be able to return home. They ignore us, laugh at us, criticize us, and then it is your day of victory. And we will prevail. "

It can be seen that the creators of ORIGIN call themselves elders. They will only exist as observers or what we call creators. They will bring a new world by completing tasks such as revealing true thoughts, reasoning about facts, and developing technology. We also found the ideal free world and that the first chapter of ORIGIN's "Fearless Contract" mentioned Project Camelot. We also carefully studied the project and its website information, and we found that the founder of ORIGIN The researchers had close contact with personnel related to Project Camelot and, at the same time, had conversations with related declassified content in 2010. The conversations involved sensitive information that cannot be published. Community users can log in to https://projectcamelotportal.com/ to find their true thoughts. We also put forward the keywords here: Anglo-Saxon for your convenience. The project also provides researchers, activists, and "whistleblowers" like Sloden access to various media to help them uncover the truth in uncharted territory. It even includes visits and exchanges of life beyond the earth, time travel, consciousness control, confidential cutting-edge technology, free energy, great changes that the earth may face, etc. We also believe that the birth of ORIGIN is related to Project Camelot (Project Camelot) Strong historical connection.

3、 What is ORIGIN's "Creed of Freedom"? What kind of world does it show?

ORIGIN FREEDOM CREED "ORIGIN FREEDOM CREED" we consider to be the code of conduct and code of conduct for ORIGIN and the entire mission. It is divided into seven chapters of the creed: Ⅰ. We are committed to creating a new parallel socio-economic order to emphasize absolute freedom, continue to purify the flaws of the traditional world consciousness and financial system, and help every believer enter a utopian parallel world of trust, openness, peace, and self. Ⅱ. Our beliefs will be inscribed in the distributed encryption civilization, our creed will exist on the blockchain smart contract, and our believers will be spread everywhere. Ⅲ. We will strictly fulfill our commitments, respect every believer's human rights, defend every believer's human and wealth rights, respect the development of social order, and build a new credit system to move toward a digital contract civilization in the free world.

IV. Our beliefs are freedom, justice, equality, fearlessness, kindness, trust, and eternity. Ⅴ. We do not advocate violence, killing, drugs, pornography, anti-government, or theft. Ⅵ. We will determine the rights and obligations in the ORIGIN digital contract world based on the election contribution and application assessment: three identities: Master, messenger, and believer. Ⅶ. We will use blockchain crypto smart contracts and a complete privacy computing system to protect every believer's right and interest of freedom of data rights, freedom of value exchange, freedom of trust establishment, and freedom of wealth distribution.

It is related to the above-related decryption of Project Camelot (Project Camelot) and the global wealth mentioned in ORIGIN's "Fearless Contract" being plundered and divided up by a few people. At the same time, this is a story of being "controlled" and " In the established timeline of "Sex," 95% of ordinary people's wealth will eventually be controlled. On this established timeline, ORIGIN veterans are trying to redefine wealth and create a meaningful world through relevant technologies. In a free world of order, personal wealth will belong to individuals, and rights and obligations will be engraved on a permanent and non-tamperable mechanism through the blockchain. As the participants (believers) change, this network will become more indestructible. It is indestructible, and every user can engrave the value exchange activities in the physical world on the ORIGIN protocol and never be erased. It will be a great change in human history and a challenge to the actual ruling class society. It will make ORIGIN's digital world fairer, just, transparent and private. There is no need to worry about whether your wealth will be frozen, transferred, plundered, or invaded. In this world of the Internet, it will become eternal.

4、 Are the serialized events in ORIGIN's "Fearless Contract" real? Why does ORIGIN have

We read the ORIGIN carefully Related material from Pact Without Fear, including Hell's Gate: Georgia Guidestones; The Evil Plan of the Anglo-Saxon Mission; The Demonic Base in the Cold Shore Islands; Joseph Patrick Kennedy and the Federal Reserve; Economic Crisis; Viruses and Plagues; World War; Bitcoin-Devil's Fruit; Judas' Lies and other chapters. A large number of historical materials are cited. No one has ever connected so much information and together formed a large and complex Based on this content, we consulted a large amount of information, from historical documents related to Judaism to the official websites of modern American far-right organizations, as well as related scientific articles, including the "Masonic Charter," Wikipedia, the United Nations website and We can confirm that many of the contents in the relevant chapters of many decryption websites are true. You can read their ORIGIN carefully. The relevant content of the first chapter of "Fearless Contract" can inspire you to understand the real world, let us better understand how the world works, and who is controlling this time and trying to change the world; the birth of ORIGIN may It is a diligent attempt to solve this problem, and we only express our respect and admiration for what he has done.

At the same time, we also found in ORIGIN's associated media X account: https://twitter.com/@SaluteORIGIN.

We can see many shadows of theology and religious systems. I have always believed that the end of science is theology. Only those with faith can change this dirty world. Everything will change no matter the method, technology, or language used. It should be a complete cultural system and powerful spiritual guidance. In ORIGIN, I see the continuation of technological development based on stories and a quasi-religious type derived from advanced decentralized technology tools. It is a dynamic macro-financial system universe, a parallel digital world independent of time and space. Code contracts are law, contract creed is morality, and free will is faith. It requires a set of unique rules that belong to this parallel world. "New Bible," ORIGIN is just the ORIGIN chapter of this "New Bible," and all this has just begun.

5、 What does ORIGIN's temple symbol represent? What does it mean?

Historically, the logo of ORIGIN has been composed of the ring-dot symbol and the four knight's symbol. The ring-dot symbol is one of the oldest symbols of humankind. In ancient Egypt, it represented the sun god Ra and the third eye, representing visions, divine roses, and enlightenment of light. At the same time, many people also call it the

'Eye of God.' The Pythagoreans also used the ring to refer to divine truth, primordial wisdom, and the unity of mind and heart. When the ring and the cross are combined, they become a rose. Representatives of cross groups. The Eye of God is reflected in the Egyptian pyramids, Freemasonry, and US dollars, but it is called the "all-seeing eye" by them, and most of them are triangular. The Eye of God in the triangle is the king's contempt for all living beings. A symbol of supremacy of power, a few people control the world's wealth and power. ORIGIN's eye of God is in the shape of a diamond, which means obeying God's will and fulfilling its obligations and beliefs based on absolute equality. The symbols of the Four Horsemen are composed of a scale, a pair of swords, an Ouroboros, the sun, and the moon, respectively representing absolute fairness, courage of justice, endless cycle, and justice of light. It is our interpretation of ORIGIN's 'Eye of Contract.' We also welcome more contributions to supplement and share understanding.

6、 Why did ORIGIN launch the temple recruitment system? What do the elders, masters, messengers, and believers represent? How do we obtain this identity? What does this identity mean?

In ORIGIN, it is not just a platform or institution that reveals the truth about the world. The oath is a joining ceremony and a manifestation of the power of faith. ORIGIN draws wisdom from ancient oaths and develops ORIGIN's creed. It is the essence of "ORIGIN's Creed of Freedom." The founders of ORIGIN are not limited to being satisfied with absolute freedom on the personal spiritual level. Every piece of history tells us that understanding the past is the key to understanding the present and building the future. ORIGIN, the name represents a combination of power and freedom. Through blockchain crypto smart contracts and a complete set of privacy computing systems, the organization is committed to ensuring the freedom of data rights, value exchange, trust establishment, and wealth distribution for every believer.

We believe that ORIGIN is a parallel universe that has its moral value standards, profit creation and distribution mechanisms, and the integration of technology and wealth. At the same time, like those ancient religious systems, it has a hierarchical system for future use. In ORIGIN's huge digital protocol, survive, create, trade, and buy. In ORIGIN's world, elders are like popes. ORIGIN's creators have built a unique universe and formulated laws, contracts, and masters. Just like cardinals, they are distributed on every continent in the world and run the regional mechanisms to operate in an orderly manner. He has huge power and mission, and the messenger is a bishop, a public official who truly serves the huge temple system. he conveys ORIGIN's culture, beliefs, and values and serves the entire parallel network. Believers are scattered around the

world like stars and are ORIGIN's real fire seeds and co-builders.

We can see from ORIGIN's deep web and recruitment system that the ORIGIN temple envoy system consists of 6 elders, 36 masters, 432 messengers, and 777,600 believers. Among them, six veteran observers created ORIGIN but did not participate in any management or related activities; 36 masters were recommended by the 12 major language families in the world, three from each language family; 36 masters recommended the messengers, each the Master can recommend 12 people, a total of 432 people, and believers can be recommended by messengers to join the membership, with a total of 777,600 people in the world.

To join and participate in the parallel world of ORIGIN, becoming a believer through the ORIGIN temple recruitment system is the first step. Obtain ORIGIN's believer digital key NFT in one of three ways. The acquisition method is: ① Donate 0.01 pieces or more ETH to enter the Dawn Fund; ② Successfully invite three believers to complete donations; ③ Spread ORIGIN's information on social media, such as entering the DIS community and Telegram community, following and forwarding ORIGIN's Twitter and YouTube videos, etc. After completing tasks such as ORIGIN, you can obtain NFT. And one address can only obtain up to 3 NFTs. In the future, those who hold Believer NFT can enjoy the global income dividend rights of the ORIGIN platform. After going online, they will receive a Junior Dawn gift box and a token airdrop reward of 5% of the total amount of their mission.

Messengers play a more important role in the ORIGIN world, with a global total of 432. ORIGIN Messenger Digital Key NFTs can be obtained by completing the following tasks: Preaching in 3 independent missions, each of which generates or There are more than 200 believers, and the total number of missionaries has reached more than 600. At the same time, three or more ETH have been donated to the Dawn Fund. After becoming a messenger, you will enjoy higher-level profit sharing and mid-level Dawn gift boxes, as well as a token airdrop reward of 10% of the total amount of your mission.

The Master is the top member of the ORIGIN Temple Mission, with only 36 in the world. To become a Master, you must have nine independent missions and preach to produce nine messengers. You also need to donate 10 ETH to the Dawn Fund. As a master, you will enjoy global income dividend rights, receive advanced Dawn gift boxes, and 15% token airdrop rewards.

7、 What is the Dawn Fund in the ORIGIN Temple recruitment system? How is the fund allocated, activated, and recorded?

In the ORIGIN Temple Mission, the members' mission goes beyond exploring knowledge and truth and deeper into assuming social responsibility. This spiritual core is reflected in the Dawn Fund established by ORIGIN. This fund is only open to ORIGIN masters, messengers, and apostles. This fund provides essential relief and support to communities facing emergencies such as major diseases, war conflicts, and natural disasters. ORIGIN fully understands the importance of timely assistance in times of crisis. Whether it is medical assistance, emergency response post-disaster redevelopment, or other emergencies, Dawn Fund is committed to positively impacting globally. Mission members can apply for relief funds based on their needs, up to 100 times the original donation amount, to ensure adequate support at critical moments. Members can send an application letter to the ORIGIN official platform through the designated email address on the official website and attach the payment address. After verification, the messenger volunteers will release the assessed public welfare support fund. ORIGIN encourages every member to participate through financial contributions and jointly provide resources, skills, and volunteer services to promote this noble cause.

In the recruitment system and the deep network, we can check the total amount of Dawning Fund donations and the usage and details of Dawning Fund. Official donations for major world events will be announced through the official website homepage and special accounts initiated by ORIGIN veterans. So far, they are all trying to change and purify the world. From believers to masters, each is a test of personal faith and responsibility and a response to social responsibility and global challenges. Joining the ORIGIN Temple Mission not only means that you will become a warrior exploring the unknown, but it is also a statement that you are willing to work hard to create a better world. At ORIGIN Temple Mission, every member is an important part of this magnificent journey. Let us move forward together for a brighter future, and I look forward to meeting you on the journey of ORIGIN.

8、 What does the ORIGIN organization create the ORIGIN decentralized Defi3.0 privacy financial protocol?

ORIGIN is a DeFi 3.0 protocol based on the algorithmic non-stable currency LGNS. It aims to build the world's first private and anonymous stablecoin payment ecosystem, set a global financial benchmark, and guide future financial development. ORIGIN uses advanced algorithmic technology to achieve stable and predictable currency issuance. This technology allows individuals to issue algorithmic non-stable coins and mint non-stable coins. Additionally, it enables the issuance of algorithmic anonymous private stablecoins, which reduces reliance on traditional central banks. ORIGIN proposes

"everyone is an issuer" and a "1:1 asset reserve anchoring issuance mechanism" to provide financial freedom and asset security solutions.

ORIGIN innovatively proposes the world's first private and anonymous stablecoin cross-chain interaction protocol, strengthening transaction data privacy protection. The ecosystem layout includes three stages: traffic entrance, ecosystem entrance, and ecosystem landing, covering bond sales, LGNS minting, the issuance of privacy stable currency A, and the digital people of Yuanverse AI smart cities and financial territories, etc. The traffic entrance stage realizes the issuance of the algorithmic non-stable currency LGNS through bond sales, and users can participate through staking and enjoy inflation benefits; the ecosystem entrance stage involves the minting and destruction of LGNS, the issuance of privacy stable currency A, and the establishment of an A pay anonymous payment ecosystem to provide users with Provide privacy-protecting payment tools; in the ecosystem implementation stage, ORIGIN's innovation will be integrated into the Yuanverse AI smart city and financial territory to form a C2G2B integrated ecosystem and build a sustainable and diverse financial system;

As a representative of DeFi 3.0, ORIGIN provides freer, safer, and more private financial solutions through algorithmic technology innovation, pointing the way for future financial development.

9、What is the significance of the birth of ORIGIN's decentralized Defi3.0 privacy financial protocol technology? How do users participate and gain wealth?

The significance of the birth of ORIGIN is to create a free, democratic, inclusive, and independent parallel world in the new financial discourse system. We are committed to leading the digital financial revolution and redefining the future monetary system by promoting technological innovation in algorithmic, non-stable coins. By establishing a private and anonymous stablecoin payment ecosystem, ORIGIN provides safe and private payment methods, emphasizes giving assets more privacy rights, rejects long-arm jurisdiction and supervision, and creates a safer, more private, and anonymous payment space for the global society.

In the parallel world of ORIGIN, we pursue financial innovation and are committed to building a new social order and giving individuals greater control. Through the decentralized economic model, each participant becomes a co-builder of the parallel world. In the parallel world of ORIGIN, we allow everyone to get rid of traditional financial restrictions and create a freer and more independent digital financial ecosystem. We illuminate the corners where light does not shine, provide solutions to the financial status

quo in marginalized areas, and build an independent digital financial society. In the parallel world of ORIGIN, we create a currency and nurture new social and group co-building models. We encourage every participant to become part of the community, make decisions, and build together a group-driven autonomous system so that everyone can find their light in the digital age. ORIGIN's journey is an exploration of the unknown, a challenge to traditional constraints, and an all-round change for global society. Together, we witness ORIGIN's vision becoming a reality, bringing endless possibilities to the future world.

There are four ways for users to participate:

01、LGNS staking system (Staking)

LGNS staking is the main source of income for users. A total block explosion occurs every 8 hours, and staking users receive block explosion income once every 8 hours. Each reward token will automatically enter the stake pool, obtaining compound interest stake returns. The stake return rate is determined based on the token stake rate in the agreement and the reward rate set by the token.

Annualized rate: APY = (1+daily staking reward token/total staking amount) index 3*365
Daily staking reward tokens = total circulation * reward ratio (rewardRAe)
Reward ratio (rewardRAe): proportional to the stake rate
Take the income of 0.4% every 8 hours as an example

1000LGNS commitment time	return change (LGNS quantity)	LGNS price(1USDT)	LGNS price(10USDT)	LGNS price(100USDT)
30 days	1432	1432USDT	14320USDT	143200USDT
60 days	2051	2051USDT	20510USDT	205100USDT
90 days	2938	2938USDT	29380USDT	293800USDT
180 days	8634	8634USDT	86340USDT	863400USDT
365 days	79144	79144USDT	791440USDT	7914400USDT

02、Cobweb System

The Cobweb system will mint corresponding tokens based on the number of daily staked reward tokens for Cobweb system rewards.
Reward coefficient Y=0.12/X+0.04
(Y is the reward coefficient, X is the number of links from the node to the original node)
X value range= {M, N, 15} minimum value
M: Direct link effective node parameters (effective node: the number of nodes staked

tokens K ≥ 100)

N: ORIGIN node stake token parameters, N=√ (0.022K-1.37) +0.089 (N is an integer, K is the number of tokens staked by the original node, K≥100)

(Staked token K value adjustment mechanism: every time the currency price increases by one time, the demand for staked tokens is halved; every time the currency price drops by 50%, the demand for staked tokens is doubled)

03、DAO Pool Rewards

ORIGIN has preset DAO pool rewards for all members as rewards for outstanding members who promote the LGNS staking system.

The reward mechanism is as follows:

1. Messenger reward coefficient G=i& (m, d, h) (1.5%≤G≤5%)

2. Master reward coefficient H=2G=2*i& (m, d, h) (3%≤G≤10%)

(m: token stake rate; d: debt ratio; h: price volatility)

Messenger DAO pool reward = G* (P1+P2+P3+·····PN)

Master DAO pool reward = H* (P1+P2+P3+·····PN)

(P is the staking income of tribe tokens every 8 hours, and PN is the minimum tribe staking income).

In ORIGIN's unique DAO pool reward mechanism, the G and H coefficients are based on the stake rate, debt ratio, and price volatility, with rewards ranging from 1.5% to 10%. The messenger DAO reward depends on the G coefficient and the tribe token staking income every 8 hours, and the master DAO reward is calculated on the H coefficient and the token staking income. Considering the staking rate, debt ratio, and price volatility, the final reward calculation includes PN and token staking income every eight hours. This design encourages active participation in the LGNS ecosystem to promote ORIGIN's long-term prosperity jointly.

04、Bond Sales Incentives

In ORIGIN's bond sales incentive plan, users who stake 1,000 or more tokens (obtain K value) will be eligible to receive bond sales rewards.

The K value of staked tokens is affected by market price fluctuations: if the currency price doubles, the number of staked tokens required is halved; if the currency price drops by 50%, the number of staked tokens required is doubled. After obtaining the K value, promoting users to participate in the purchase of Bond bonds will receive a 5% token

reward. These reward tokens will be released linearly within five days.

In addition, our promotion incentive strategy further enhances the appeal of user participation. Users can receive discounts by purchasing Bond bonds directly and earn an additional 5% token reward by encouraging new users to participate in bond purchases. This reward mechanism not only provides incentives for promoters but also increases the user base and activity of the platform.

(Staked token K value adjustment mechanism: every time the currency price increases by one time, the demand for staked tokens is halved; every time the currency price drops by 50%, the demand for staked tokens is doubled).

10、 What are the components of ORIGIN's decentralized Defi3.0 privacy financial protocol? How do the seven major systems of protocol finance work?

There are seven major operating mechanisms in the ORIGIN protocol: treasury contract, sales contract, bond contract, stake contract, transaction turbine mechanism, FOMO POT prize pool, and anonymous stablecoin issuance contract. The ORIGIN platform runs seven complementary contracts, forming a complete financial ecosystem.

These contracts play the following roles:
① Treasury contract: serves as a vault for funds, storing all funds collected by the agreement;
② Sales contract: ensure that the minting of each LGNS is supported by the value of 1 USDT and is supported through inflation or deflation adjustment;
③ Bond contract: independent of market data, automated, and slowing down the impact of new LGNS supply on the market;
④ Stake contract: Provide users with the main way to participate in income, hold LGNS for a long time, and automatically realize the distribution of income and compound interest;
⑤ Transaction turbine mechanism: Promote an effective cycle that stabilizes currency prices and forms an autonomous market system;
⑥ FOMO POT prize pool: increase the trading activity of the platform and, at the same time, feedback on the consumed resources to trading users;
⑦ Anonymous stable currency issuance contract: realize deflation of non-stable currency and safe and anonymous transaction circulation of stable currency.

11、 What do LGNS (Langiris) and A (Anubis) represent, respectively? What role does it play in ORIGIN's decentralized Defi3.0 privacy financial protocol?

01、Algorithmic non-stable currency LGNS
Token name: LGNS
Public chain: Ethereum
Issuance Method: minting issuance

Users can obtain LGNS through three methods, among which ORIGIN is issued through minting based on the sale of liquidity and reserve bonds.

① Users can directly purchase LGNS in the Swap pool. There is no discount at the real-time price, and the agreement does not generate new LGNS.
② When the user purchases liquid bonds, the LP ownership is transferred from the user to the protocol. As compensation, the user purchases preferential LGNS tokens (5-day linear release), and the protocol mints new LGNS tokens based on RFV.
③ When users purchase reserve bonds, USDT is owned by the protocol. As compensation, users purchase preferential LGNS tokens (5-day linear release), and the protocol mints new LGNS tokens based on RFV.

In summary, users directly purchase new LGNS on Swap without a discount agreement, and new LGNS are minted for both bonds to balance supply and demand and meet the staking reward rate. Purchasing reserve bonds brings more LGNS to meet the staking reward rate, while liquidity bonds stimulate the continuous addition of the LP pool.

02、Privacy Stable Coin A
Stablecoin name: A
Public chain: Anubis
Issuance Method: minting issuance

Privacy Stablecoin A is a privacy-anonymous stablecoin launched by the ORIGIN platform based on the value of USDT anchored, that is, 1A=1USDT.
The ORIGIN platform adheres to the 1:1 reserve issuance guarantee mechanism: the treasury reserves for every A token issued. There are sufficient USDT assets in the pool as anchor support. ORIGIN minted the algorithmic non-stable currency LGNS token through an original algorithm protocol into a privacy-anonymous stable currency A.

The minting mechanism includes the LGNS asset anchoring rate benchmarking protocol algorithm. LGNS casts and issues A through the minting protocol algorithm. After A is successfully minted, LGNS injects it into the black hole and destroys it; asset anchoring includes: After stablecoin A is minted and issued, the treasury reserve assets USDT achieves 1:1 contract locking, which means that actual treasury reserves back each

stablecoin A, and users can reverse redeem A for USDT at any time.

The algorithmic non-stable currency LGNS is the basic core token of the ORIGIN protocol. The entire project's traffic entrance connects the entire ecosystem's operation. The algorithm-driven non-stable currency LGNS is successfully issued through the bond sales strategy. Users can obtain high-quality benefits by participating in staking LGNS.

Privacy Stablecoin A is a privacy and anonymous stablecoin launched by the ORIGIN platform based on the value of USDT. It will play a huge role in ecosystem implementation, such as Apay anonymous payment, Yuanverse AI smart city, financial ecosystem, and WEB3.0 social contact.

12、The Significance of Recruitment

ORIGIN The recruitment system of the Temple Mission is a process of members joining and a journey through history and the future to explore the truth and origins.

ORIGIN's recruitment system is rooted in deep layers of human history. From the story of Joseph Patrick Kennedy and the Federal Reserve to the profound revelations of the economic crisis, every piece of history tells us that understanding the past is the key to understanding the present and building the future. At ORIGIN, taking an oath is a joining ceremony and a manifestation of the power of faith.

Through conversations with key figures such as Camelot Project founder Karry Cassidy, ORIGIN incorporates more in-depth discussions about power, knowledge, and truth into its recruiting messages. These conversations can help us understand how to uphold truth and pursue freedom in a complex world. In ORIGIN's value system, we focus not only on personal growth and development but also on global challenges, such as the impact of viruses and plagues, the lessons of world wars, and the rise of digital currencies such as Bitcoin. These value systems help us understand the complexity of the modern world and find our place in it.

In today's exploration, we traveled through time and space together, revealing the profound connotation of the ORIGIN Temple Mission recruitment system. From believers to masters, each is a test of personal faith and responsibility and a response to social responsibility and global challenges.
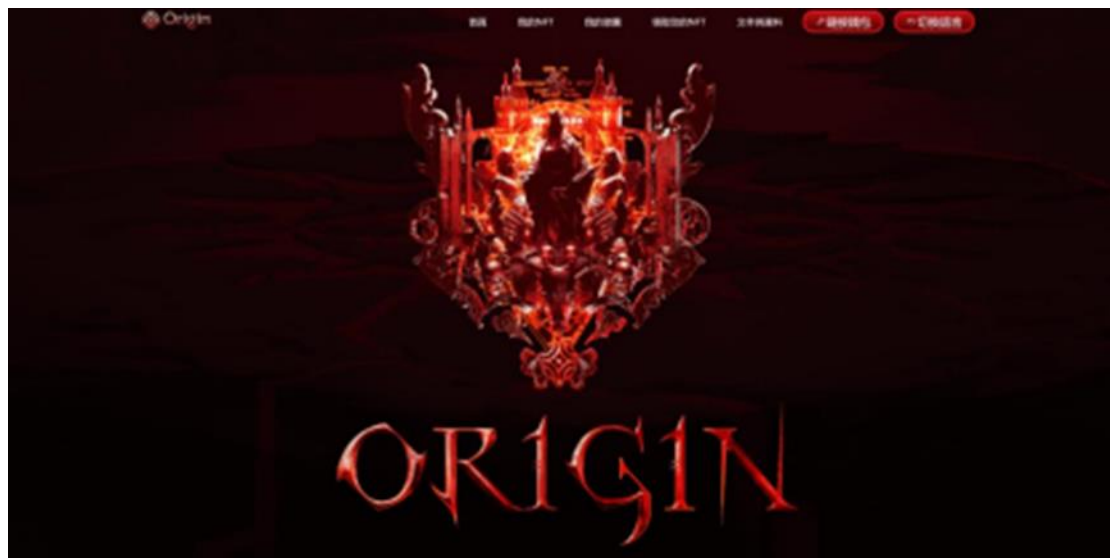

13、Recruitment Methods

ORIGIN Temple Mission is recruiting members, including masters, messengers and disciples.

In this multi-dimensional recruitment system, the ORIGIN Temple Mission is not only looking for members but also for those who dare to explore the truth, face challenges bravely, and are willing to contribute to building a better future.

The ORIGIN Temple emissary system consists of 6 patriarchs, 36 masters, 432 messengers and 777,600 believers. The first step to becoming a believer is obtaining a digital key NFT, your digital identity credential in the ORIGIN parallel world. Apply to join by filling in the membership information on the official website, participating in the believer's NFT identity confirmation as required, and then advancing to become a messenger, master, and enjoy the corresponding rights and benefits.

14、Comments on Each Functional Section of The Recruitment System

Open the recruitment system network https://origindao.io meeting. After seeing the above page, based on my experience, We will airdrop your believer NFT to your designated wallet address. Please pay attention to ensure you receive it.

Home page: Introduction to the ORIGIN Recruitment Mission and ORIGIN's Creed of Freedom, a page for filling in personal information for believers to join the membership, and detailed recruitment rules for the ORIGIN Temple Mission. Finally, there is the data disclosure of the Shuguang Fund, which provides a more transparent understanding of the use of the fund.

My NFT: After submitting personal information and joining the recruitment mission, the NFT displays of believers, messengers, and masters you own are available for viewing.

My mission: Display the details of my mission (including my current identity, the total number of believers certified by my mission, the total number of messengers certified by my mission, the total number of masters certified by my mission, the total number of ETH donated by my mission) Receive your NFT with my mission's direct address list: After submitting the information and joining as a believer, click to receive the NFT. We will airdrop your believer NFT to your designated wallet address. Please pay attention to ensure you receive it.

Documents and materials: All white papers, text materials, PPT, pictures, and video introductions about ORIGIN. It is important information for understanding the entire project and can be consulted by everyone. Link wallet: Supports mainstream wallet tools, is safe and efficient, and facilitates everyone's recharge of digital currency to participate in the ORIGIN Temple Mission. Switch language: currently supports 12 languages, making it easier for believers worldwide to view and disseminate it.
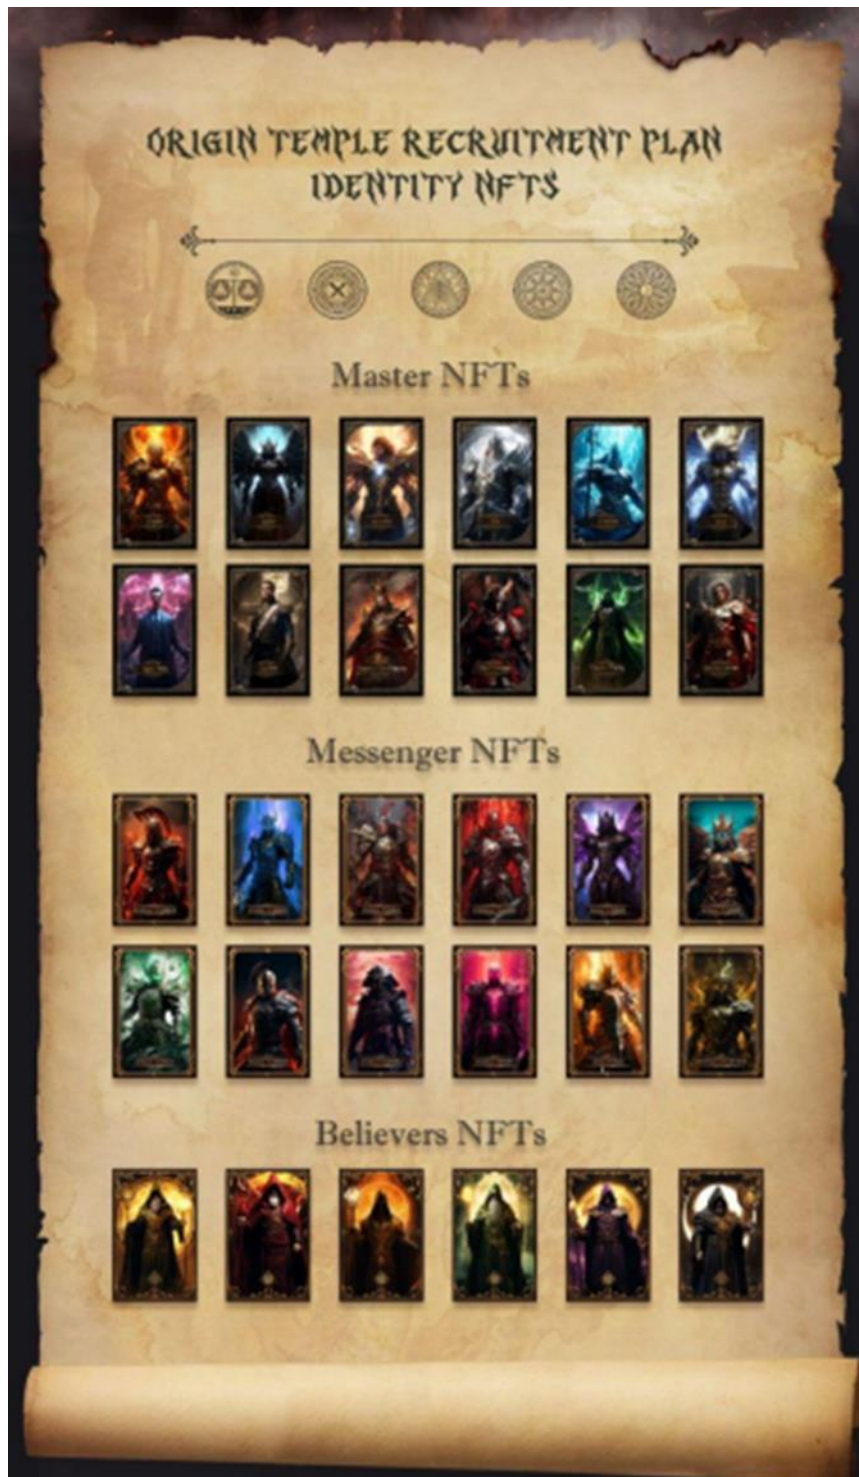

15、Explanation of NFTs Identity System, Explanation of NFTs Connotation (6 Types of Believers, 12 Types of Messengers, 12 Types of Masters)

The core digital identities available to users in the ORIGIN recruitment system can be divided into believers, messengers, and masters.

The images of mages from different regions are represented, including the Egyptian wizard who represents the element of God's eye, the Chinese master who represents the scale, the Arab wizard who represents the sun and moon, the African wizard whose symbol ouroboros represents, and the British wizard who represents the double swords of justice, symbolizing ORIGIN: the world mage and other six images. The twelve messengers are warriors from different cultures who represent fearlessness and righteous courage. They are Arab generals, Egyptian war gods, Nordic warriors, Korean warriors, black warriors, Roman war gods, European paladins, Japanese samurai, and Spar—twelve images, including warriors, Spanish knights, Indian warriors, Chinese generals, etc.

The patriarchs of ORIGIN are composed of twelve images of demigods. Their god camps are Apollo, the sun god; Odin, the Nordic God; Poseidon, the king of the sea; Hades, the king of Hades; and Hercules, the God of power. Zeus, the God of gods, and the human camp is composed of the most powerful and influential humans in history.

They are Master Merlin, Napoleon, Oda Nobunaga, Tesla, Alexander, and Qin Shihuang Ying. There are 30 NFTs in total. They represent the most intelligent and regionally distinctive people in all humankind, and they are all spokespersons and spiritual continuation of the ORIGIN culture.

16、The Conditions and Requirements for The Recruitment System to Become a Believer, Follower, and Master

The ORIGIN temple emissary system consists of 6 patriarchs, 36 masters, 432 messengers, and 777,600 believers. 6 veteran observers created ORIGIN but did not participate in the management or related activities. Thirty-six masters were recommended by the 12 major language families in the world. Each master recommended four hundred thirty-two messengers. Each master can recommend 12 followers by the messenger: recommended membership, no limit to the number of members. The first step for believers to become believers is to obtain the digital key NFT, your digital identity certificate, in the ORIGIN parallel world.

The global total is 777,600. You can become a believer and obtain the Apostle NFT certificate in the following ways: ① Donate 0.01 ETH or more to the Dawn Fund; ② Successfully invite three believers to complete the donation; ③ Spread ORIGIN information on social media, such as entering the DIS community and Telegram community, follow and forward ORIGIN's Twitter and YouTube videos, etc.

Believers can enjoy the global income dividend rights of the ORIGIN platform, receive a primary Dawn gift box after going online, and receive additional token airdrop rewards in evangelistic missions.

Messenger
Messengers play a more important role in the ORIGIN world, with a global total of 432. The way to become a messenger is to preach in 3 independent missions so that each mission produces 600 believers, totaling 1,800; at the same time, donate three or more ETH to the Dawn Fund.
After becoming a messenger, you will enjoy higher-level income dividends, mid-level Dawn gift boxes, and 10% token airdrop rewards.

Grandmaster
The master is the top member of the ORIGIN Temple Order, numbering only 36 in the world. To become a master, you need to have nine independent missions and preach to generate nine messengers, and at the same time donate ten or more ETH to the Dawn Fund. As a master, you will enjoy global income dividends, receive a premium Dawn gift box, and a 15% token airdrop reward.

17、The Value and Later Rights and Interests of Holding NFT

Holding NFT is everyone's digital identity certificate in the ORIGIN parallel world, and each identity enjoys a different value. Believers can enjoy the global income dividend rights of the ORIGIN platform, receive a primary Dawn gift box after going online, and

receive additional token airdrop rewards in evangelistic missions.

After becoming a messenger, you will enjoy higher-level income dividends, mid-level Dawn gift boxes, and 10% token airdrop rewards. Become a master, and you will enjoy global income dividends, receive a premium Dawn gift box, and a 15% token airdrop reward. In addition, it enjoys the protection of the Dawn Fund to provide necessary relief and support to communities facing emergencies such as major diseases, war conflicts, and natural disasters.
Mission members can apply for relief funds based on their needs, up to 100 times the original donation amount, to ensure adequate support at critical moments.

ORIGIN is committed to leading the digital financial revolution and redefining the future monetary system by promoting technological innovation in algorithmic, non-stable coins. NFT is just the tip of the iceberg of the entire project. There will be more rights later. Obtaining early NFT is equivalent to having an early admission ticket to the ecosystem, participating in the DAO governance of the ORIGIN platform, giving priority to participating in the ecosystem development of the ORIGIN platform, and enjoying the corresponding high benefits—the amount of income.

18、The Purpose and Mission of The Dawn Fund After the Donation

In the ORIGIN Temple Mission, the members' mission goes beyond exploring knowledge and truth and deeper into assuming social responsibility. This spiritual core is reflected in the Dawn Fund established by ORIGIN. This fund provides essential relief and support to communities facing emergencies such as major diseases, war conflicts, and natural disasters. ORIGIN fully understands the importance of timely assistance in times of crisis. Whether it is medical assistance, emergency response, post-disaster redevelopment, or other emergencies, Dawn Fund is committed to positively impacting globally. Mission members can apply for relief funds based on their needs, up to 100 times the original donation amount, to ensure adequate support at critical moments.

ORIGIN encourages every member to participate through financial contributions and contribute resources, skills, and volunteerism to advance this noble cause. Shuguang Fund is the financial guarantee for us to face challenges and our commitment to the future. From Economic Crisis to Hell's Gate: The Prophecies of Georgia's Guiding Stone, we learn the importance of preparation and anticipation. In this multi-dimensional recruitment system, the ORIGIN Temple Mission is not only looking for members but also for those who dare to explore the truth, face challenges bravely, and are willing to contribute to building a better future.
